# Restore Your Natural Beauty!

## Laser Hair Removal

Now men and women are making unwanted facial and body hair a thing of the past. No more painful waxing, electrolysis or razors! Our laser system delivers 21<sup>st</sup> century technology for treatment of this distressing problem. Cleared for permanent hair reduction, our laser can treat men and women of all skin tones safely and effectively; even clients with a suntan.

We can remove hair from all parts of the body including the face, legs, arms, underarms and back. We can also treat sensitive areas like the chest, nipples, and bikini line. Our lasers can treat the fine hair on the woman's upper lip just as easily and effectively as the coarse hair on a man's back.

## Laser Genesis Skin Rejuvenation

Laser skin rejuvenation is an innovative, technologically advanced way to promote vibrant and healthy looking skin in men and women. Now you can have the youthful appearance by treating those conditions that are typically associated with premature signs of aging and sun damage; such as excessive redness, large pores, uneven texture, and fine lines and wrinkles. You can expect to see subtle, yet consistent results after each treatment, without unwanted side effects such as bruising or excessive skin irritation. Your therapy is performed in a relaxed, comfortable manner without the use of general or local anesthesia, gel or cream.

## Vein Therapy

Now men and women alike are making unsightly facial veins a thing of the past. No more painful injections! With the most advanced technology, a unique design, and a longer wavelength, our laser can safely and effectively treat superficial face veins (or "telangiectasia") on men and women of all skin tones. You can experience outstanding results without bruising, blistering or complication in a safe, comfortable environment.

## IPL-Photorejuvenation

We can quickly, safely and comfortably remove sun and age spots from your face, chest, arms and hands without gel or anesthetic cream. The signs of sun damage will flake off after one or two treatments, leaving clear, younger looking skin. We can treat virtually any part of your body safely and effectively. The face, chest, shoulders, and arms are the most popular areas for treatment because they have typically had the most sun exposure. Both discrete spots and skin densely covered with freckles respond well to treatment.

## 3D Skin Rejuvenation

As we grow old imperfections turn into multi-layered problems. Treat all your skin imperfections or signs of aging from deep within. Your skin will be renewed at every level to achieve the perfect youthful and radiant complexion you always deserved!

## Titan™ Skin Tightening

The Titan Procedure is a safe, non-surgical process that uses infrared light to tighten the skin and reverse the signs of aging. In addition, Titan can stimulate long-term collagen rebuilding that leave clients with younger looking skin. This procedure treats sagging and redundant skin throughout the body – including the face, neck, chest, abdomen, and thighs. Since the Titan procedure is heating tissue under the skin's surface, clients of any skin type can be treated. Men and women of all ages have been successfully treated.

## Vibraderm™

The next generation microdermabrasion technology utilizes a patented vibrating paddle to remove the top layer of skin. By reducing the thickness of the epidermis we create an easier environment to stimulate collagen within the dermis. It also increases the permeability of the skin allowing active ingredients in skin care products to be more effective.

## SkinMedica™ Vitalize Peel®

With the Vitalize Peel, clients may achieve dramatic improvement in epidermal texture, tone, lessening of superficial lines and a healthier, more youthful look and feel with minimal "down time". The renewal process has been clinically proven to help pigmentation problems (such as age spots) fade by stimulating collagen production in the cells underneath the skin's surface. The Vitalize Peel will also help prepare the skin to receive maximum results prior to treatments, such as laser resurfacing.

## Pharmaceutical Cosmetics

We provide various cosmeceutical skin care products that act synergistically with our anti-aging laser treatments. An individualized home care regimen is recommended to accelerate the benefits of your treatments and improve your results.
